EXAMINER'S COMMENT***Drawings***

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: 19. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The specific limitation(s) of a third cam radially connected to a second output shaft are not anticipated or made obvious by the prior art of record in the examiner's opinion. For example, An discloses an animation device comprising a first motor (41) coupled to a first gear train having a first (42) and second output shaft (43); said output shafts (42,43) configured perpendicular to each other; a left cam (44) radially connected to a left end of said first output shaft (43), said left cam (44) driving a left follower to induce motion in

a left arm assembly (40); a right cam (44) radially connected to a right end of said first output shaft (43), said right cam (44) driving a right follower to induce motion in a right arm assembly (40); a middle cam (38) radially connected to said output shaft (37), said middle cam (38) driving a middle follower (38a) to induce motion in a midbody perimeter hoop (20).

However, the prior art fails to teach a third cam radially connected to a second output shaft.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
